

Data Warehousing

CS-452

Spring 2023

Activity 7

Question:

Read from two flat files and two tables from any SQL database. Then load data to MS SQL Server (as discussed in the class). Now schedule the ETL process to occur every week using SQL Server Agent.

Note:

Prepare a word document to upload using snapshot and written explanation.
MS Word file name should be as follows (Don't change the format).

19B-001-SE_Your_Name_Activity07_Group#

If you use any website, book, or research paper provide the link(s).
Make sure to upload prepared activity Word Document, script, package and dataset files or any other supporting files.
